

info@yeslogic.com | www.princexml.com

This PDF document was created by a demonstration version of Prince. The demonstration version is fully functional but includes this promotional page which we ask you not to remove. You can use the demonstration version for demonstration purposes and for academic dissertations. Prince is a powerful formatter that converts XML into PDF documents. Prince can read many XML formats, including XHTML and SVG. Prince formats documents according to style sheets written in CSS. Prince has been used to publish books, brochures, posters, letters and academic papers. Prince is also suitable for generating reports, invoices and other dynamic documents on demand.

whytheluckystiff gem repository mirror. You can install gems using:
gem install hpricot --source http://10.0.1.234/why

Subversion

[/svn/oceania/trunk](#) is where you should chuck smaller crap like libraries, plugins etc. This will be resynced to the google-code project's svn when we're back in the big smoke.

[/svn/railscamp-projects](#) is where you can put railscamp Rails/Camping projects and what-not.

[/svn](#) has mirrors of various other SVN reports; Rails, Technoweenie and a few others.
